

# Website for a Local Small Food and Farming Business

## 1. Introduction

- For this first project I will redesign the website for a local small business owner and friend who was in the process of trying to make her personal webpage via Wix: <https://riveradayna.wixsite.com/misitio>
- The original website is still under construction and some information is missing. The services they provide are:
  - Fresh fish, produce, cooked food and desserts sold weekly at a Farmer's Market.
  - Seasonal private dinners.
  - Agrotours
  - Workshops

## 2. Expected List of Features

- English / Spanish Option
- Navigation Bar
- Sign Up Modal for Newsletters
- Pictures in Carrousel
- Updatable Weekly Menu in Accordion format
- Updatable Board with latest fish catch, with sale feature.

## 3. Market Survey

- After some research I couldn't find a website for a similar business, since most of them rely mostly on Facebook and Instagram.
